Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 09/431,437	Applicant(s) SHIGA.ET AL.	
	Examiner Jason P. Salce	Art Unit 2623	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/2/2007 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 40-59 and 87-126 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The independent claims state the limitations, "such that said reduced sized images are independent of said program data" and then recites "wherein said reduced size images are superimposed via predetermined processing in a single-frame format on the program data". The examiner notes that the recitation of the

reduced sized images being independent of said program data is broad and is not clear whether the two sets of data are independent by creation or transmission, therefore to recite that said reduced size images are superimposed via predetermined processing in a single frame format on the program data prevents the reduced sized images and the program data from being independent of said program data. The examiner recommends amending the claims to clarify these two distinctions between the creation of the program data and reduced size images being independent because the transmission of these two sets of data is not independent from one another.

5. Claims 40-59 and 87-126 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The independent claims state the limitations, **“such that said reduced sized images are independent of said program data”** and then recites **“wherein said reduced size images are superimposed via predetermined processing in a single-frame format on the program data”**. The examiner notes that the recitation of the reduced sized images being independent of said program data is broad and is not clear whether the two sets of data are independent by creation or transmission, therefore to recite that said reduced size images are superimposed via predetermined processing in a single frame format on the program data prevents the reduced sized images and the

program data from being independent of said program data. The examiner recommends amending the claims to clarify these two distinctions between the creation of the program data and reduced size images being independent because the transmission of these two sets of data is not independent from one another.
